FINAL REJECTION

Response to Applicant's Amendment

The rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of the amendments to the claims.

Claims 1-5 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Harris et al. (US Pat. 5,475,323) as shown in the last office action..

The rejection of claims 16-19 under 35 U.S.C. 103 (a) as being unpatentable over Fernandez et al. (US Pat. 5,448,200) is withdrawn in view of the arguments to the claims.

Response to Applicant's Arguments

Applicant argues that Harris fail to disclose an internal signal. The argument is not persuasive because the internal signal is generated at nodes (914) in Figure 25 of Harris et al and the current generator circuit (912, 906) regulates the differential current of the amplifier responsive to the internal signals at the nodes (914).

Allowable Subject Matter

Art Unit: 2816

Claims 6-20 would be allowable.

The claims would be allowable because the prior art references do not disclose a plurality of complementary signal generating circuits and processing circuits, a seventh transistor, an eighth transistor, and a second inverter.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
